

Precision Size Grader

for Whole Green Beans

Whole Fresh Green Bean Diameter Sizing Technology

Improve sizing accuracy and consistency

- Rollers and adjusting system built to exacting tolerances
- Robust construction for consistent accuracy all season, year after year
- New floating product deflectors for consistent product orientation

Reduce maintenance costs

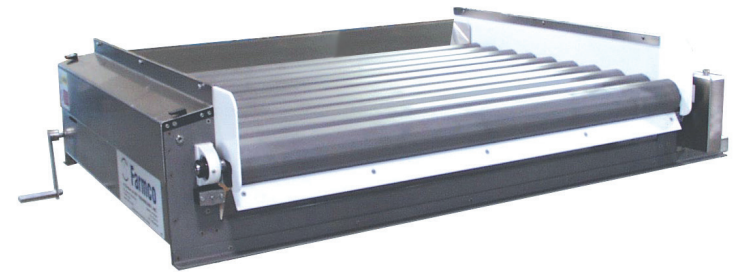

- Few moving components or wear parts
- No costly annual rebuilds

Improve product quality and yield

- Patented drive system prevents pinching between the rollers, minimizing product damage
- Platform design means no product bed tumbling, no broken beans

Ease of use

- Simple on-the-fly size adjustment
- Open access for sanitation

Benefits

“Floating” deflectors orient product parallel to the sizing gap while permitting larger diameter product to travel over the machine.
