Performance

- Fast and dependable electronic braking ensures quick product changeovers and low maintenance
- Capacity of up to 280 kg/h (600 lb/hr) on shredded lettuce
- Heavy duty timing belt drive system
- Designed to run heavy loads at high speeds without splitting baskets or wearing bearings
- Low center of gravity ensures greater stability compared to other models

Flexibility

- Fully adjustable speed and timer settings
- Easy to relocate—no need to bolt to floor
- Suitable for a wide variety of products
- Basket liner available for very fine cut sizes

Safety

- Low to the ground to minimize lifting and the risk of operator injury
- Locking lid ensures cycle is not interrupted before completion and increases operator safety
- Stainless steel construction
- All electrical components housed in IP66 (NEMA 4X) enclosure
