

Iso-Flo[®] Utility

Vibratory Conveyors

Built on over 25 years of proven conveying technology, the third generation Iso-Flo Utility Conveyor boasts an updated design that's even more sanitary and robust to provide versatile, cost effective conveying.

Sanitary Design

Every aspect of the system utilizes sanitary design and manufacturing principles:

- Plate frame construction
- No enclosed tubes
- 100% welds with ground & polished welds in product zones
- Sanitary EVM drive
- Taller bed sidewalls for better water and product containment
- Sanitary manufacturing finishes

The Iso-Flo Utility Conveyor's design satisfies the most stringent sanitation demands and meets all FDA food safety requirements.

Efficient, Versatile Conveying

The updated design features enhancements to eliminate screen blinding, reduce product breakage and is optimized for product transitions, ensuring quality and boosting line efficiency.

It can also be equipped with screens in a variety of styles to align, singulate, dewater, length grade, width grade and remove fines.

Reliability

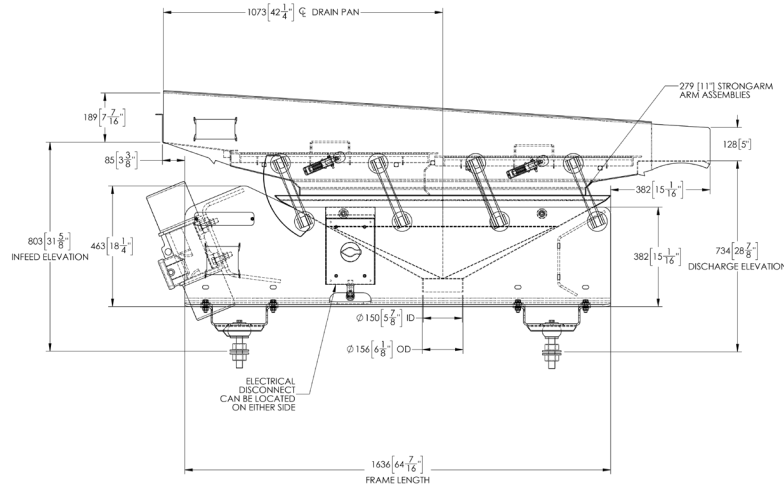

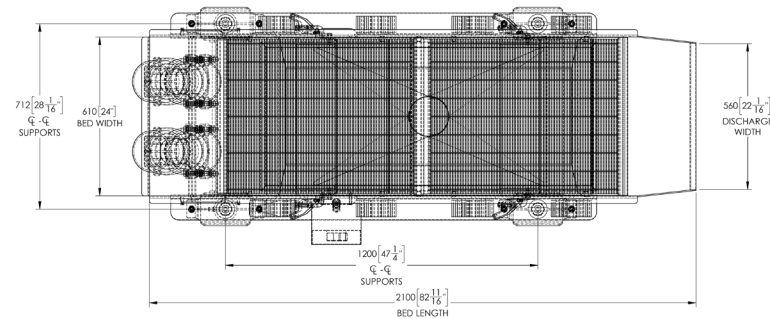

Taking superior reliability to a new level, the Iso-Flo[®] Utility Conveyor includes:

- Industry-leading five year warranty
- Strong Arm[™] spring arms
- Oil-free motors
- Stainless steel ground arm

Space-Saving Footprint

At only 83 in (2100 mm) long and a width of either 24 in (610 mm) or 36 in (910 mm), the compact Iso-Flo Utility Conveyor seamlessly integrates into your line without taking up valuable floorspace.

Suitable for Many Food Applications

Built to deliver the highest performance and lowest lifecycle cost, the Iso-Flo Utility Conveyor is ideal for a variety of applications:

- Potato
- Meat and Poultry
- Nuts & Snack Foods
- Pasta, Rice & Prepared Foods
- Fruit and Vegetables
- And more...
